PUPPY GUIDELINES					
USE NYLABONE® PUPPY SPECIFIC PRODUCTS UNTIL PERMANENT ADULT TEETH DEVELOP BE SURE TO SELECT THE RIGHT SIZE CHEW FOR YOUR PUPPY BY REFERRING TO INDIVIDUAL PUPPY PACKAGE GUIDELINES.					

It is important that you get to know a dog's chewing style and to select the appropriate type of chew and the proper size and formulation based on a dog's age, breed, chewing style and weight.

The pressure exerted by a dog's jaw can put tremendous stress on their teeth. These sizes are only guidelines: If your dog is between sizes or is especially powerful, we recommend choosing a larger size - large enough to encourage chewing from the side, rather than from top to bottom.

Many little dogs are powerful chewers and may need a larger size. If you have more than one dog in your household, select chews appropriate for the largest, strongest chewer. Remember to always supervise the use of any dog chew or toy!!!
